

I live in Raleigh, NC and am a listener of K-LOVE radio on 106.7FM out of Greensboro, NC. K-LOVE means much to me and my family and is a great service to us. I appreciate them enough to be a financial supporter. I am very concerned about the possibility of Low power FM signals displacing this service that I have come to depend upon. Please do not allow this to happen. I think it would have a very negative effect on the central NC area for KLOVE to be displaced from its place on the FM band. Many people are encouraged by the messages they hear on KLOVE - sometimes at just the moment in their lives when they need the encouragement in order to emotionally survive. Please do not allow KLOVE to be taken off the air in deference to LPFM signals.
